Create a Social Media Link for WordPress

Social media is a great way to stay in touch with your readers. Not everything you do has a place on your blog or website. Some things just work better on social media. In order to make it easy for your readers to find you on the social media of your choice you could place clickable icons on your site. Using some easy HTML and free icons, this tutorial will show you how to do just that.

In this tutorial we are creating a Pinterest link for <u>FantasyWritersWorkshop.com's</u> Pinterest board. Let's do this!

First you will need to create some HTML code that will control the link. The code will take the icon from its location and add a link to it. It will have a hyperlink reference, an image source reference, and an alternate text. Don't worry if you're not familiar with HTML. This tutorial will show you what you need to do. It will look like this:

<img src="" alt=""

<u>Side note</u>: You can add other features, such as specifying the size of the image if you want it to be different than the source image you are using, but since we're working with 32x32 icons I don't want to change the size and I don't want a border, so I've deleted those features. That's the topic of another tutorial.

Paste or type this code into a text editor such as notepad.

Next find and upload the social media icon you wish to use. I am using the free icons provided by <u>Elegant</u> <u>Themes</u>.

Once you have the icons on your computer it's time to go into WordPress. In WordPress, go to Media and select Add New:

Create a Social Media Link for WordPress

	http://artasywritesyworksbop.com/?attachment.id=750		*

```
<a href="" target="_blank"><img
src="http://fantasywritersworkshop.com/wp-
content/uploads/2014/09/pinterest.png" alt="" </a>
```

Since I'm using Pinterest, I will make the alternate text say something like "Fantasy Writers Workshop on Pinterest". It now looks like this:

```
<a href="" target="_blank"><img
src="http://fantasywritersworkshop.com/wp-
content/uploads/2014/09/pinterest.png" alt="Fantasy Writers' Workshop
on Pinterest" </a>
```

Now I need to get the link. That's the URL I want my readers to go to when they click on my icon. Simply go to the site you want to send them to and copy the URL. This is not the main page on Pinterest. This is Fantasy Writers' Workshop's board on Pinterest.

Now paste the link within the quotes after href. It now look something like this:

```
<a href="http://www.pinterest.com/brown1095/fantasy-writers-workshop/"
target="_blank"><img src="http://fantasywritersworkshop.com/wp-
content/uploads/2014/09/pinterest.png" alt="Fantasy Writers' Workshop
on Pinterest" </a>
```

Next go to your widgets in WordPress and grab a text box (or use a current text box) and drop it where you want the icon to appear.

Next, go to your website and test your icon.

It works!

Continue this same process for each social media network you wish to add. Paste the next set of code a few lines under the previous code. This is so the code is easy for you to see if you want to go back to it later.
